

The Model T200H High Range Chemiluminescence NO/NO₂/NO_x Analyzer

The Model T200H High Range NO / NO_2 / NO_X analyzer uses the proven chemiluminescence detection principle and advanced electronics to allow accurate, dependable, continuous measurements for high concentration stack gas monitoring and other applications. A high-efficiency stainless steel thermal NO_2 converter provides durable and consistent operation under the harshest conditions (other converter options also available). The T200H may be fitted with an optional, internal paramagnetic O_2 sensor or an infrared absorption CO_2 sensor, reducing integration and operating costs.
