

# INSTRUMENT TRAINING

Helping YOU become the expert.

- Choose from a variety of training options to meet your specific needs
- Engage in hands-on instrument maintenance and troubleshooting practice with our technical experts
- Use your specialized knowledge and skill to keep your instruments operating at peak performance

**TELEDYNE API**  
Everywhere you look™

# BASIC FACTORY TRAINING

- Covers theory of operation, menu structure, maintenance, and calibrations for each base model T Series instrument.
- Overview of our advanced NumaView™ Software and NumaView™ Remote Software interfaces.
- We also offer basic training for process ozone instruments in industrial gas applications.

# ADVANCED FACTORY TRAINING

- Covers in-depth theory of operation and pneumatic and electronic troubleshooting for each base model T Series instrument with hands-on labs.
- Overview of our advanced NumaView™ Software and NumaView™ Remote Software interfaces.
- Tour of the state-of-the-art factory where the instruments are designed and assembled.
- We also offer advanced training for medium and high range gas instruments in CEMS applications.

# CUSTOMIZED TRAINING

- Tailored to your specific needs and offered at our factory in San Diego, CA, or at your facility.
- Contact us to obtain a quote and information on available dates.

# VIRTUAL TRAINING

- Webinar-based training offered in 4-hour increments with a live expert instructor.
- Choose from either: basic instrument-specific training or customized training based on your products, applications, or topics of interest.
- Scheduled at your convenience using your choice of Zoom or Microsoft Teams.
